Front-End Developer

Web Development Engineer | Creative Design

Adaptable and results-oriented Junior front-end developer with a passion for creating and designing visually appealing and effective work. Team player, fast learner, and critical thinker possessing knowledge and experience in React, JavaScript, HTML, and CSS. Experienced in implementing technology-based solutions for business and security issues, along with maintaining standards, procedures, and improving business functionality. Additional expertise in graphic design in Adobe Photoshop and GIMP. Ambitious to use technical and software skills, plus knowledge of technology trends, to work as a front-end developer.

TECHNOLOGY PROFICIENCIES

Platforms – Mac OS, Microsoft Windows, Linux, iOS

Programming– React, JavaScript, HTML5, CSS, MySQL, Django, Python, Bash Scripting

Software - Microsoft Office, MySQL Workbench, Adobe Photoshop, Ubuntu, Wireshark, GIMP, Git, VS Code

PROGRAMMING EXPERIENCE

EnStock NYC: Streetwear Brand Website

HTML, CSS, JavaScript, React, Photoshop – Created, designed, and developed a NYC based streetwear brand named EnStock NYC. The EnStock NYC website provides clients with an understanding of what the brand stands for, how it was created, and contact information. Clients can also view information on the brand's latest upcoming collaboration with the legendary Jordan brand. Logo designed in Photoshop and created based on EnStock NYC's representation of peace, fashion, and the Bronx.

BLACKPINK BORN PINK: World Tour Artist Website

HTML, CSS, JavaScript, React – An interactive tour website designed and developed for internationally famous South Korean girl group BLACKPINK's current world tour. Clients are provided with information on BLACKPINK's current tour dates, group updates, social media profiles, individual member profiles, and latest music. The construction of the website is to provide verified information in a visually appealing way to reach not only the group's fans, but anyone who is curious to learn about who exactly BLACKPINK is.

BORN PINK: World Tour Ticketing Database

MySQL – An organized database closely constructed to provide clients with information on tour dates, cities, countries, and ticket sale numbers. Database information is based on the artist's North American tour stops and details the number of tickets remaining to be sold, and information on remaining ticket types such as resell or Ticketmaster platinum type tickets.

Hotel Greeting Page

JavaScript, HTML, CSS, GIMP – Constructed and designed The Himmapan Hotel's greeting page where clients will be greeted depending on the time of day and are provided information on how to reserve a room. The greeting page design is based on IO Interactive's video game Hitman 3 and includes the Himmapan Hotel logo designed based on Thailand's national flower, animal, and country flag. The Himmapan Hotel's phone number was created based on Hitman 3's main character Agent 47.

Hotel Room Availability Page

JavaScript, HTML, CSS, GIMP – Developed and designed Thailand's The Himmapan Hotel's room availability page that provides clients with information on the hotel name, location, and current number of rooms available for bookings. Hotel name and information is based on IO Interactive's video game Hitman 3's The Himmapan Hotel.

Bouncing Kenny Pygame

Python, Pygame– Developed an interactive game where clients click on the animated Kenny characters to allow the characters to bounce around in different directions on the user's screen, leading to the characters falling and disappearing once the client no longer interacts with said characters.

WORK EXPERIENCE

P.S. 19 Judith K. Weiss

Oct 2020 – June 2021

K-5th Grade Teacher

- Troubleshooted and resolved technical and networking issues for students, parents, and colleagues with iPad, Windows, software applications, and Chromebook issues.

- Utilized Otus, STARS Classroom, Microsoft Excel, and G Suite to analyze and manage students' data, assessments, and grades to allow vital and proficient access to updates and records.
- Integrated technology with instructional learning and development of interactive lessons plans.
- Analyzed and resolved security incidents for remote instruction alongside colleagues maintaining protocols, following security frameworks, and attending daily sessions discussing technical and business requirements.
- Provided support through daily communication with parents to address student's needs and resolve issues.
- Taught science to students in kindergarten through 5th, increasing student engagement and student development of ELA, speech, math, technological, and science skills.

Amalgamated Nursery School

Jan 2020 – May 2020

Student Teacher, Internship

- Utilized ClassDojo for data analysis, management of students' progress and assessments, and communicating with parents, addressing parents and student's needs.
- Developed interactive lessons for in person and remote instruction for Pre-K students that led to an increase in student engagement and student development of ELA and math skills.
